

OMEGA 41 SYSTEM

Invisible fixing system using lateral suspension for aluminium composite cassettes

Principle

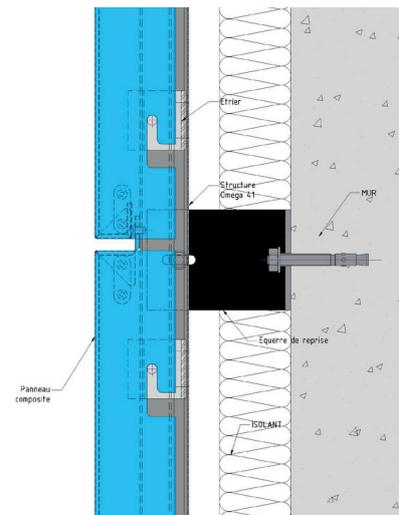

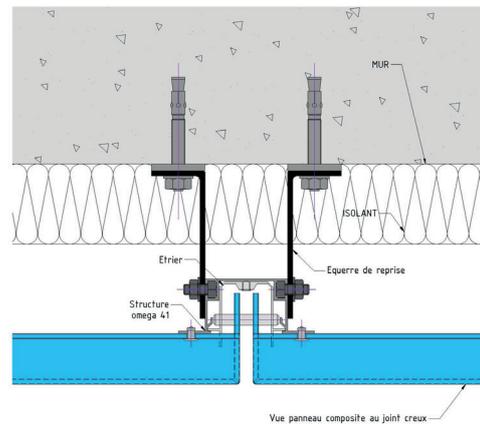

Installation system using lateral suspension on pre-adjusted clips with invisible fixings.

Applications

Horizontal and vertical facade architecture with raised or curved forms (curved parts, contours, diamond points, deep coffers, etc.) and straight-line forms.

The benefits

- Invisible fixings
- Saves time with pre-adjustment of the clips on the top-hat profiles of the framework
- Clips individually removable directly at the facade
- Large cassette (up to 1.40 m by 6 m)

Fitting

- Attach the top-hat profiles with pre-adjusted clip
- Install the cassettes by lateral suspension of the slots on the clips
- Lock at the top of the cassette.

The system kit

- Ready-to-use cassettes
- Framework profiles with pre-adjusted clips supplied
