

# SR2C

For horizontal or vertical layout – Visible fixing system riveted on 2 sides

## Principle

Rainscreen cladding system using front-fixing and rivets on two sides

## Applications

Horizontal and vertical layout with raised or curved forms (curved parts, diamond shapes, deep coffers, etc.) and straight-line forms.

## Benefits

- Colored rivets corresponding to panel's finish
- Optimisation of the distances between the fixing centres of the mounts, reducing installation time

## Installation

- Fix vertically main profiles on brackets
- Fix the rivets in the pre-drilling of the panels with a suitable tool

## Our Offer

- Ready-to-use panel
- Framework profiles supplied
- Painted rivet and rivet cover
