

SR4C

For horizontal or vertical layout – Visible fixing system riveted on 4 sides

Principle

Rainscreen cladding system using front-fixing and rivets on four sides

Applications

Horizontal and vertical layout with raised or curved forms (curved parts, diamond shapes, deep coffers, etc.) and straight-line forms.

Benefits

- Invisible profile in the hollow seal
- Option of closing the hollow seal with a single fold
- Colored rivets corresponding to panel's finish
- Pre-drilled panel to ensure alignment on the facade
- Draining fixing system

Installation

- Fix vertically main profiles which have notches at hollow of the horizontal joints
- Fix the rivets in the pre-drilling of the panels with a suitable tool
- Rivet the four sides of the panel to the profiles.

Our Offer

- Ready-to-use panel
- Framework profiles supplied
- Painted rivet and rivet cover
