

SV4C SYSTEM

Visible fixing system screwed on 4 sides

Principle

Rainscreen cladding system using front-fixing screws on four sides

Applications

Horizontal and vertical layout with raised or curved forms (curved parts, diamond shapes, deep coffers, etc.) and straight-line forms.

Benefits

- Draining fixing system
- Option of closing the hollow seal with a double ply
- Colored screw corresponding to panel's finish
- Limited main profiles (according to our study) reducing installation worktime
- Specific self-drilling screws limiting tightening and allowing panel expansion

Installation

- Fix vertically main profiles which have notches at hollow of the horizontal joints
- Interlock the horizontal top-hat profiles
- Screw panels vertical sides where there is pre-drilling on profile

Our Offer

- Ready-to-use panel
- Framework profiles supplied
- Painted self-drilling screw
