

TIM ALU

For horizontal or vertical layout – invisible (cassettes) fixing system using sliding stirrup

Principle

Rainscreen cladding system using interlocking on pre-adjusted stirrup with invisible fixings.

Applications

Horizontal and vertical layout with raised or curved forms (curved parts, diamond shapes, deep coffers, etc.) and straight-line forms.

Benefits

- Invisible fixings
- Quick installation on main profiles using self-drilling screws to attach to brackets
- Patented system of pre-adjusted sliding stirrup enabling removal directly at the facade
- Large cassette (up to 1.40 m by 6 m)
- Two different profiles to allow a better inertia

Installation

- Fix main profile at each hollow seal
- Install the cassettes by lateral suspension of the slots on the stirrups which are positioned before delivery to allow the perfect fitting of the cassette
- Lock at the top of the cassette.

Our Offer

- Ready-to-use cassettes
- Framework profiles with pre-adjusted clips supplied
