

ECOSTA GLAZED

Panel for an elegant facade

The **ECOSTA GLAZED** facade panel with its reflective or enamelled glass finishes is ideal for buildings with sleek lines. It can be coordinated with the clear sections or provide a splash of colour depending on the desired architectural effect. Possibility to add screen-printing to the facade. HST (heat soak treatment) can be used on request to toughen the glass – ideal for large dimensions or earthquake zones.

Applications

New building

Renovation

Buildings: tertiary, residential, education, hotels, leisure, offices, healthcare, retail, public-access buildings and more.

Installation

ECOSTA GLAZED can be added to traditional curtain wall horizontal frameworks, vertical frameworks and traditional set up.

Benefits

- Safety (with all components glued) and durable
- Easy to install with minimal maintenance
- Available in a wide range of colours, sizes and thicknesses
