

SONORA

Our panel with high acoustic performance

SONORA is the first patented facade panel with an acoustic attenuation of RW 50. It considerably reduces noise from outside and offers unparalleled acoustic insulation inside the building. **SONORA** offers multiple architectural options with its glass, aluminium or steel finishes.

SONORA is available from RW 42 up to RW 50.

Applications

New building

Renovation

Buildings: tertiary, residential, education, hotels, leisure, offices, healthcare, retail, public-access buildings and more.

Installation

SONORA can be added to 4-sided systems, traditional curtain wall horizontal and vertical frameworks (on Research & Development study).

Benefits

- Patented panel to meet acoustic performance requirements
- Written statement of acoustic performance on demand
- Exterior facing according to architectural wishes

Dimensions

- Up to 1500 x 3000 mm
