

# JPS SYSTEM

Horizontal invisible fixing system for aluminium composite cassettes

## Principle

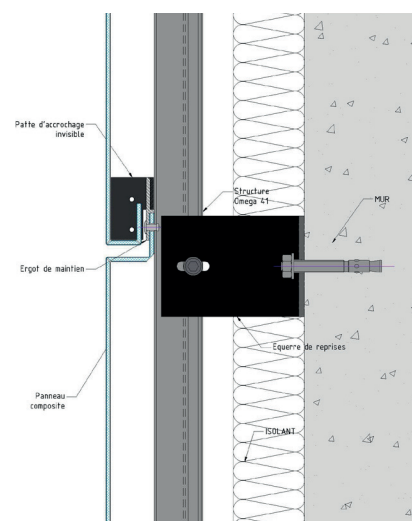

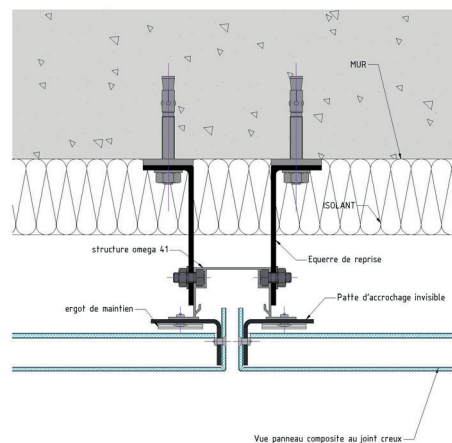

Installation system using interlocking on plates with invisible fixings.

## Applications

Horizontal facade architecture with straight-line forms.

## The benefits

- Invisible fixings
- Quick installation using interlocking
- Cost-effective solution without horizontal profiles
- Locking at top of cassette, no visible fixings in the recessed joints
- Long cassettes

## Fitting

- Attach the vertical top-hat profiles
- Install the cassettes by interlocking with attachment to the vertical top-hats profiles
- Lock at the top of the cassette

## The system kit

- Ready-to-use cassettes
- Framework profiles supplied
